Postlude

4. Is there an item below which is a privilege: a) You feel everyone has, regardless of race? b) A minority person is least likely to have? c) The lack of which would be most painful or troublesome to a minority person?

1. I can go shopping and feel that I will not be followed by a clerk who makes me feel that I am not trusted in that establishment.
2. I can do well in a situation without people being surprised that someone like me could have done what I did, or attributing my success to luck.
3. I can take a job with an affirmative action employee without people inferring that I was hired only because of my race, sex, or sexual orientation.
